PROJECTS

Connected Unisim (Process Digital Twin)
(09/2021 - Present)
- **A Process Digital Twin (PDT) is a live, virtual process representation of a Plant. A digital twin is a digital representation of a real-world entity or system. In the context of IoT, Digital Twins are linked to real world objects and offer-information on the state of the counterparts, respond to changes, improve operations and add value**

AML Social Web UI (Apple Customer Systems)
(08/2020 - 09/2021)
- **Social web is an application which is maintained to get all the complaints and requests raised on Social platform (Twitter). It is to get the customer complaints based on Posts and tags which are mentioned in twitter. Those posts which are assigned in twitter will assign a radar to the Team who responds on that post according to complaint or request raised in Social platform.**

Zilker -SSE Online-WS (Apple Customer Systems)
(09/2019 - 08/2020)
- **Zilker is an On-boarding application and compliance validation tool built for ADE applicants. It acts as one stop tool to manage Questionnaires, application on-boarding, Workflow rules management, User submissions & review etc. Users can create their own Question/Questionnaire to join into the community.**

Apple Admin Portal -YODA (12/2018 - 09/2019)
- **Get support admin tool is used to manage configuration for major applications in Self Service Platform. Some admin tools are managed by Client and rest are managed by some portfolios. Intuitive Admins application is critical to Client Business Users, who depend on Admin applications to drive changes efficiently and on time.**
